FOREG[®]

LIBRARY

EXPERTISE IN LIBRARIES.

EXPERTISE in LIBRARIES.

Knowledge calls for order and structure. Whether it is open-access sections in libraries, archives or library depots – Forster brings order and neatness to every system.

In combining state-of-the-art engineering and personal creativity, Forster delivers long-lived innovative high-quality solutions that provide a maximum of flexibility and efficiency.

Competence in consulting, design and execution ensures that FOREG® library shelving systems evidence the individual touch and professionalism in each and every detail.

FOREG® – shelving to create space.

FUNCTION in its finest FORM.

Library shelving is designed to put order and lucidity to book collections and thereby constitutes an integral part of the room's interior. If the whole is to emanate a harmonic atmosphere it is necessary to artfully weave aesthetic and functional aspects into a single arrangement.

An ambition that Forster can achieve step by step thanks to a well thought-through modular system. Fully matching modules and a wide choice of accessories open up a multi-faceted range of options. FOREG® library shelving systems cover a wide spectrum, from mobile to stationary shelving, panel accessories and labels, for customers to choose their very own design of a municipal, state, national or university library.

FOREG® – shelving to create space.

MOBILE shelving – adding SPACE to your DEPOT.

A vast collection of books requires space for expansion. Mobile shelving easily removes bottlenecks. Compared with stationary systems, their mobile equivalents offer almost double the storage space – a clear benefit also in economic terms since getting the most out of the available space makes for substantial reductions in room costs, also in the long term. In view of inexorably rising prices for premises, space-saving shelving makes for a useful investment for the future.

Today, Forster's agile quest for innovation adds value: mobile shelving enlarges the available space by accessing only the aisle currently needed. Open when needed, closed when wanted – mobile bays perfectly adapt to individual requirements.

- *Mobile shelving moves heavy loads at a fingertip.*
- *Mobile shelving doubles the available space.*
- *Crank drive or electric drive.*
- *Multi-storey designs are possible.*

FOREG® – shelving to create space.

STATIONARY shelving – designed to suit various requirements.

Library shelving systems come in a variety of arrangements, materials and dimensions, depending on the use they are to be put to. For shelving in a reading room or open-access area, the choice of design, material and colour is very important since these elements contribute substantially to creating the pleasant atmosphere that fosters reading.

Where many users compete for space and freedom to browse through the stocks, Forster stationary shelving systems are an advantageous solution.

FOREG[®] – shelving to create space.

Highlight individuality – by choice of MATERIAL and COLOUR.

At the customer's request, shelving can be furnished with individualised end panels. Whether perforated or plain steel, timber or glass – designs can be optimally matched to the surrounding architecture. The requirements shape your choice – and individual appearance is pivotal. Create your very own environment – digital printing allows you to select customised designs.

Perforated end panels and frames have the added bonus of improving air flow through the stored goods.

Wide choice of useful ACCESSORIES for working LIBRARIES.

Suspended wired book support

Suspended flat book support

Low sliding book support

High sliding book support

Low back stop

High back stop

Top panel

Angled book support with arrester

Label holder

Pull-Out shelf

Steel shelf

Flexibility in storage.

With FOREG® library shelving you get variety as a standard. System components that are thought through down to the last detail make you forget the monotony of a customary library. An abundance of accessories is available both for the cantilevered FOREG® 1000 and the case-type FOREG® 2000 systems. Components can be combined at will and retrofitted. Modules can be height-adjusted in increments of 20 mm or 15 mm for cantilevered systems.

No tilting for books.

Forster booksupports impose a tight regime on books. Take your choice from a range of designs all of which keep books upright and straight. Sliding and angular booksupports are available in various heights and widths. Suspended booksupports make for a secure grip. Side stops, which hold in place books stored in open frames, can easily be height-adjusted and do not restrict air flow.

Magazine display for an overview.

The aim is to keep an eye on the overall picture. Panels displaying journals at various angles offer an excellent view, showing them off at their best. The shelves can be fitted to every frame height, reflecting individuality and professionalism throughout.

FOREG® – shelving to create space.

Optimal solutions for all needs.

FOREG® library shelving systems are used world-wide. Years of experience and cumulative know-how have created considerable demand for Forster systems. Our customer is king – and you can take our word for it. High personal commitment and a total focus on service motivate us to develop solutions that fulfil customer expectations exactly in line with their specifications.

A large pool of good ideas is the wellspring of a great vision: we are pleased to take up the challenge from customers with unusual ideas that inspire us to pursue innovation.
