FOREG[®]
OFFICE

NEAT AND EFFICIENT OFFICE FURNITURE

FOREG® Office – efficient furniture for efficient offices.

Varying requirements and different ambients call for a variety of filing and storage solutions. FOREG® Office has the optimal design for every office and every budget. Several designs and dimensions to choose from make sure that a customised solution will be found.

The system offers you a choice: keep your full office space while multiplying your storage space or keep your storage space while extending your office space. Even moving is no problem. Thanks to the modular structure of the system you simply take your shelving with you, extending or, if necessary, reducing it to adapt it to its new environment.

Modern, multifunctional, flexible and adaptable!

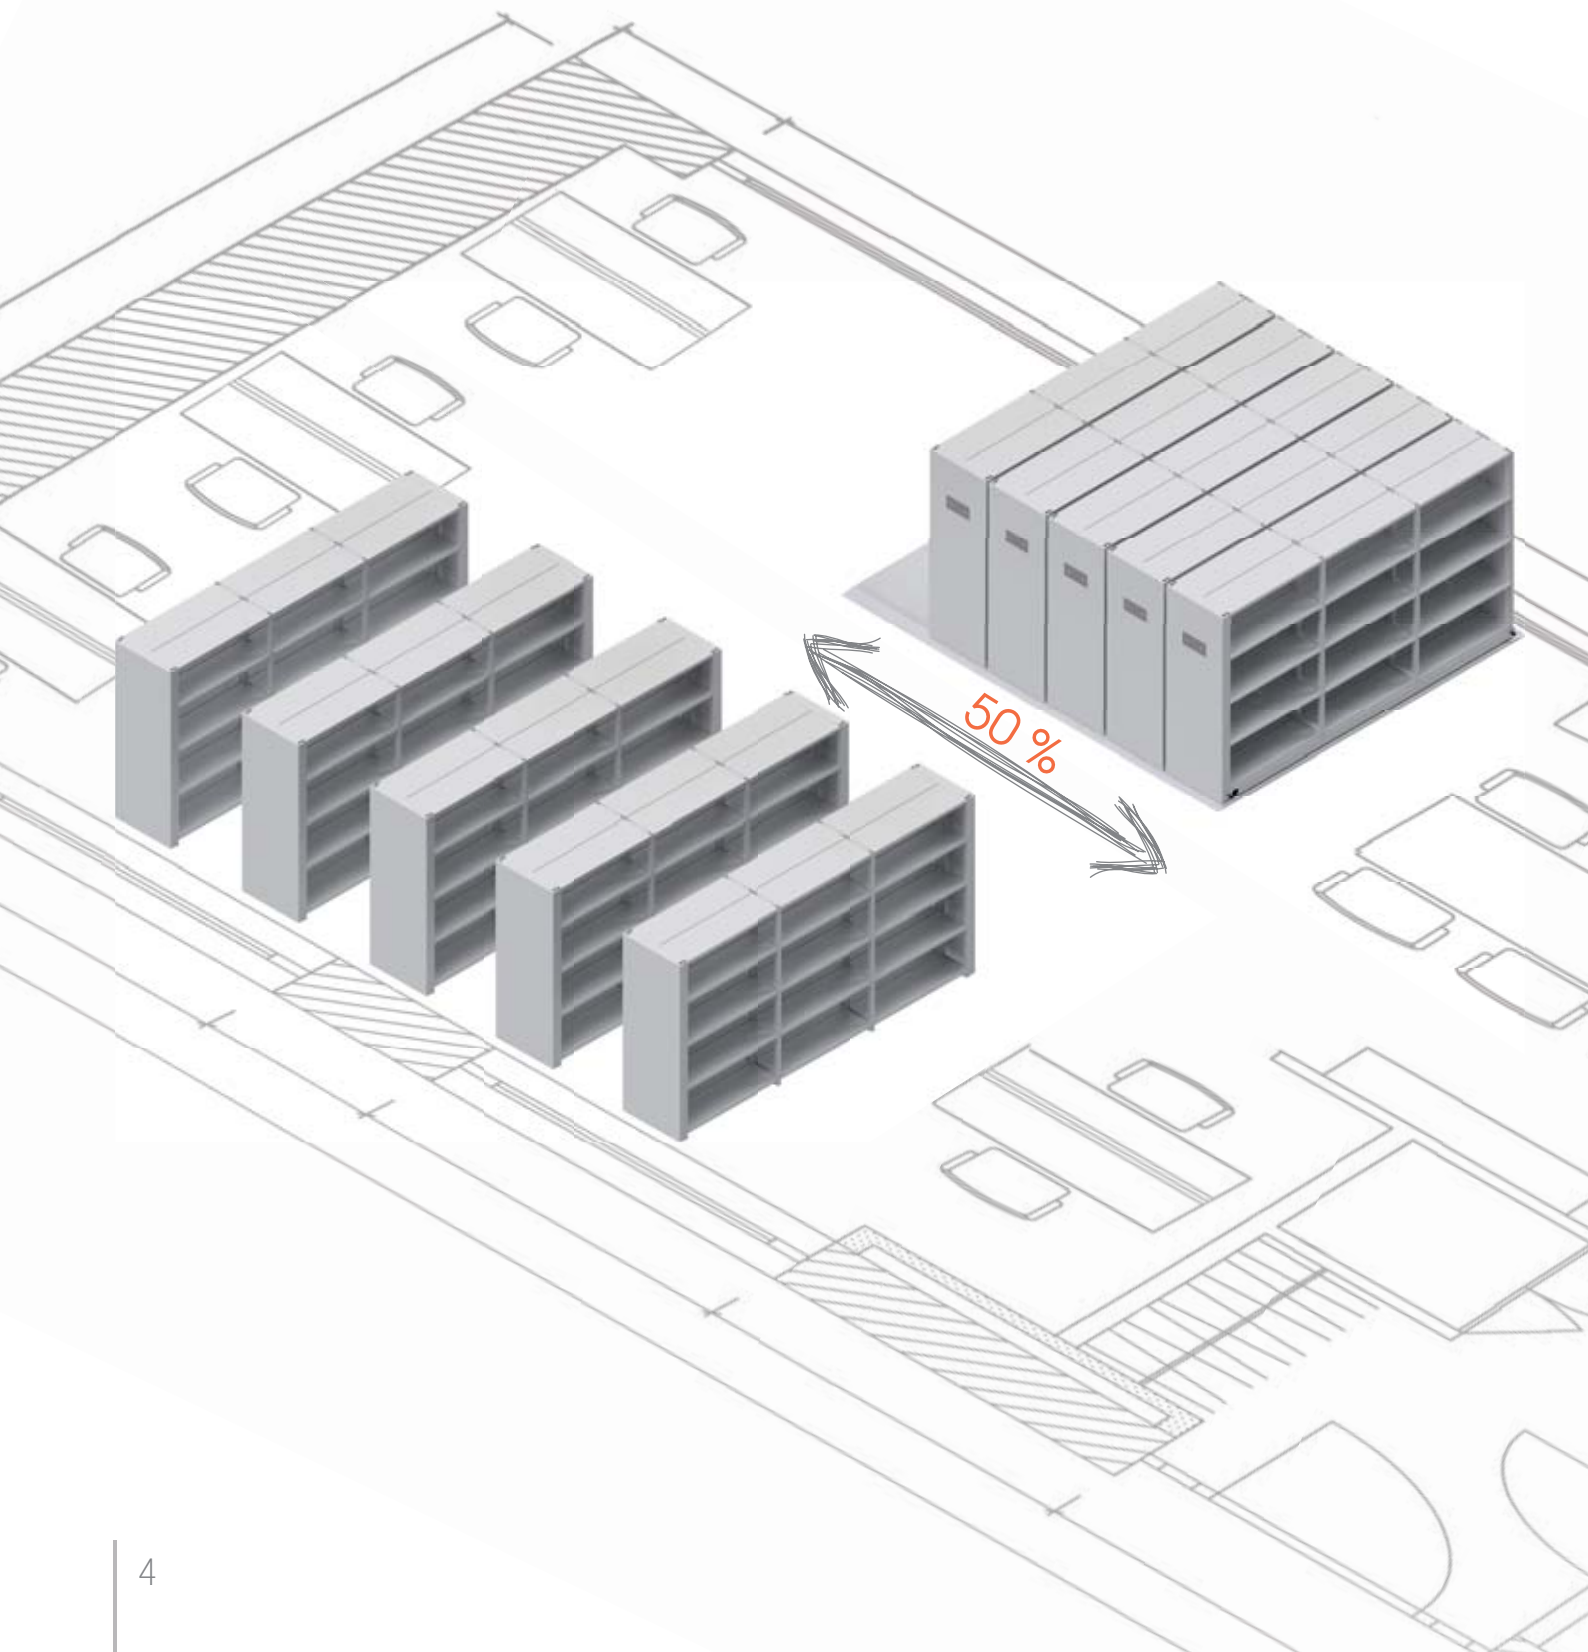

FOREG® Office - the easy solution:

- *Optimise the use of your available floor space*
- *More office space without the need for expensive add-on construction*
- *Shelving designed as modules*
- *Storage space arranged exactly to your needs*
- *Unrestricted use of the available space*
- *Combination of storage and conference zones*
- *Support for clean desk policy and desk sharing*
- *Individualised design*
- *Optimised standard sizes*
- *Easy to rearrange the floor plan*
- *Quick to move*

Well-designed functional furniture facilitates working in an office and increases the feel-good factor for your staff. In this way, FOREG® Office provides the prerequisites for maximum performance.

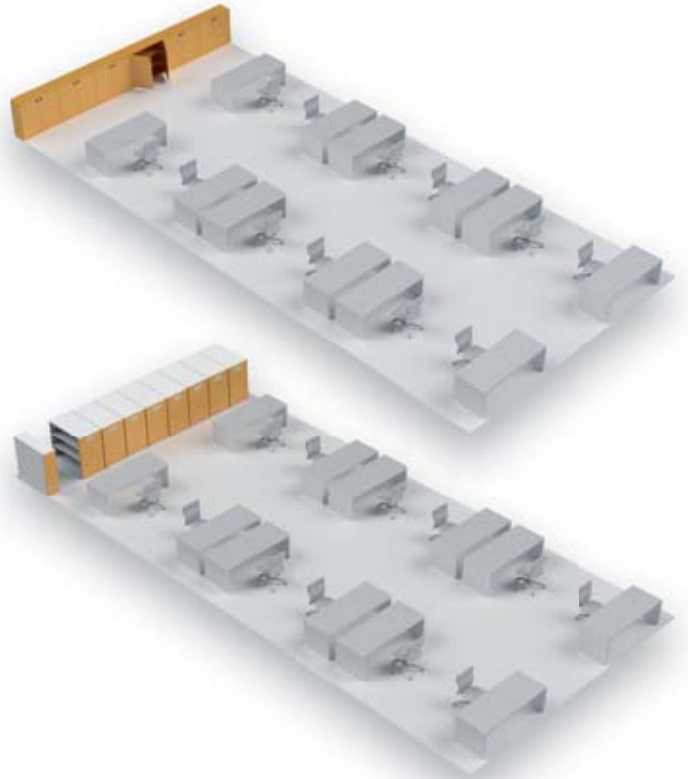

Save space and you SAVE COSTS.

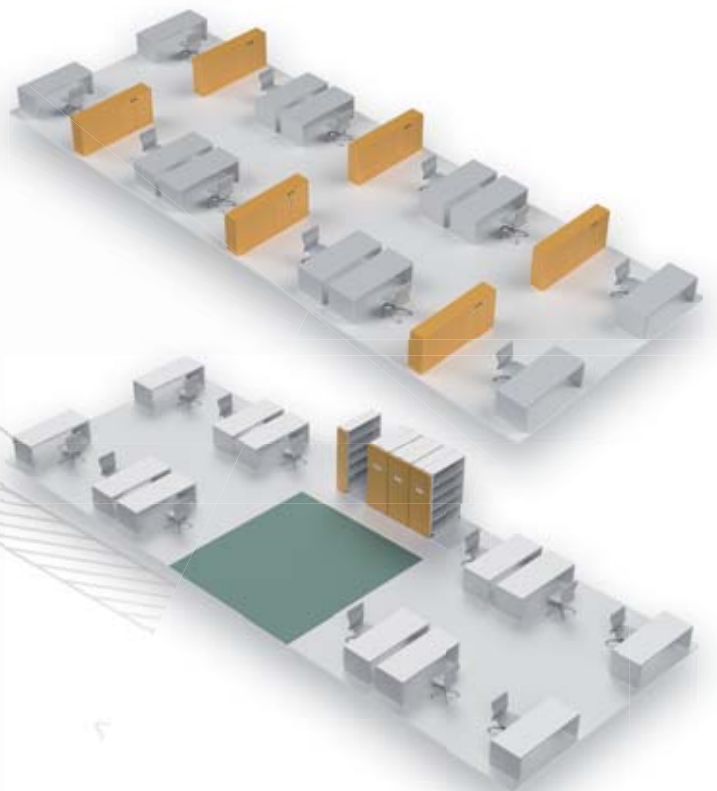

When space is at a premium, FOREG® Office opens up entirely new dimensions. In contrast to stationary shelves and traditional filing cabinets, the system provides access only to the aisle in use at any one time – so that the remaining floor area offers more than double the storage space.

Shortage of space is the true challenge for every interior designer who often needs a spatial miracle to accommodate all the requests for space. It is in this situation where FOREG® Office comes into its own: whether it is in the home office, an office with minimal room or an open-plan office.

Archiving space is almost tripled while the office space remains unchanged.

Additional office space while the archiving space remains unchanged.

Customised DESIGN.

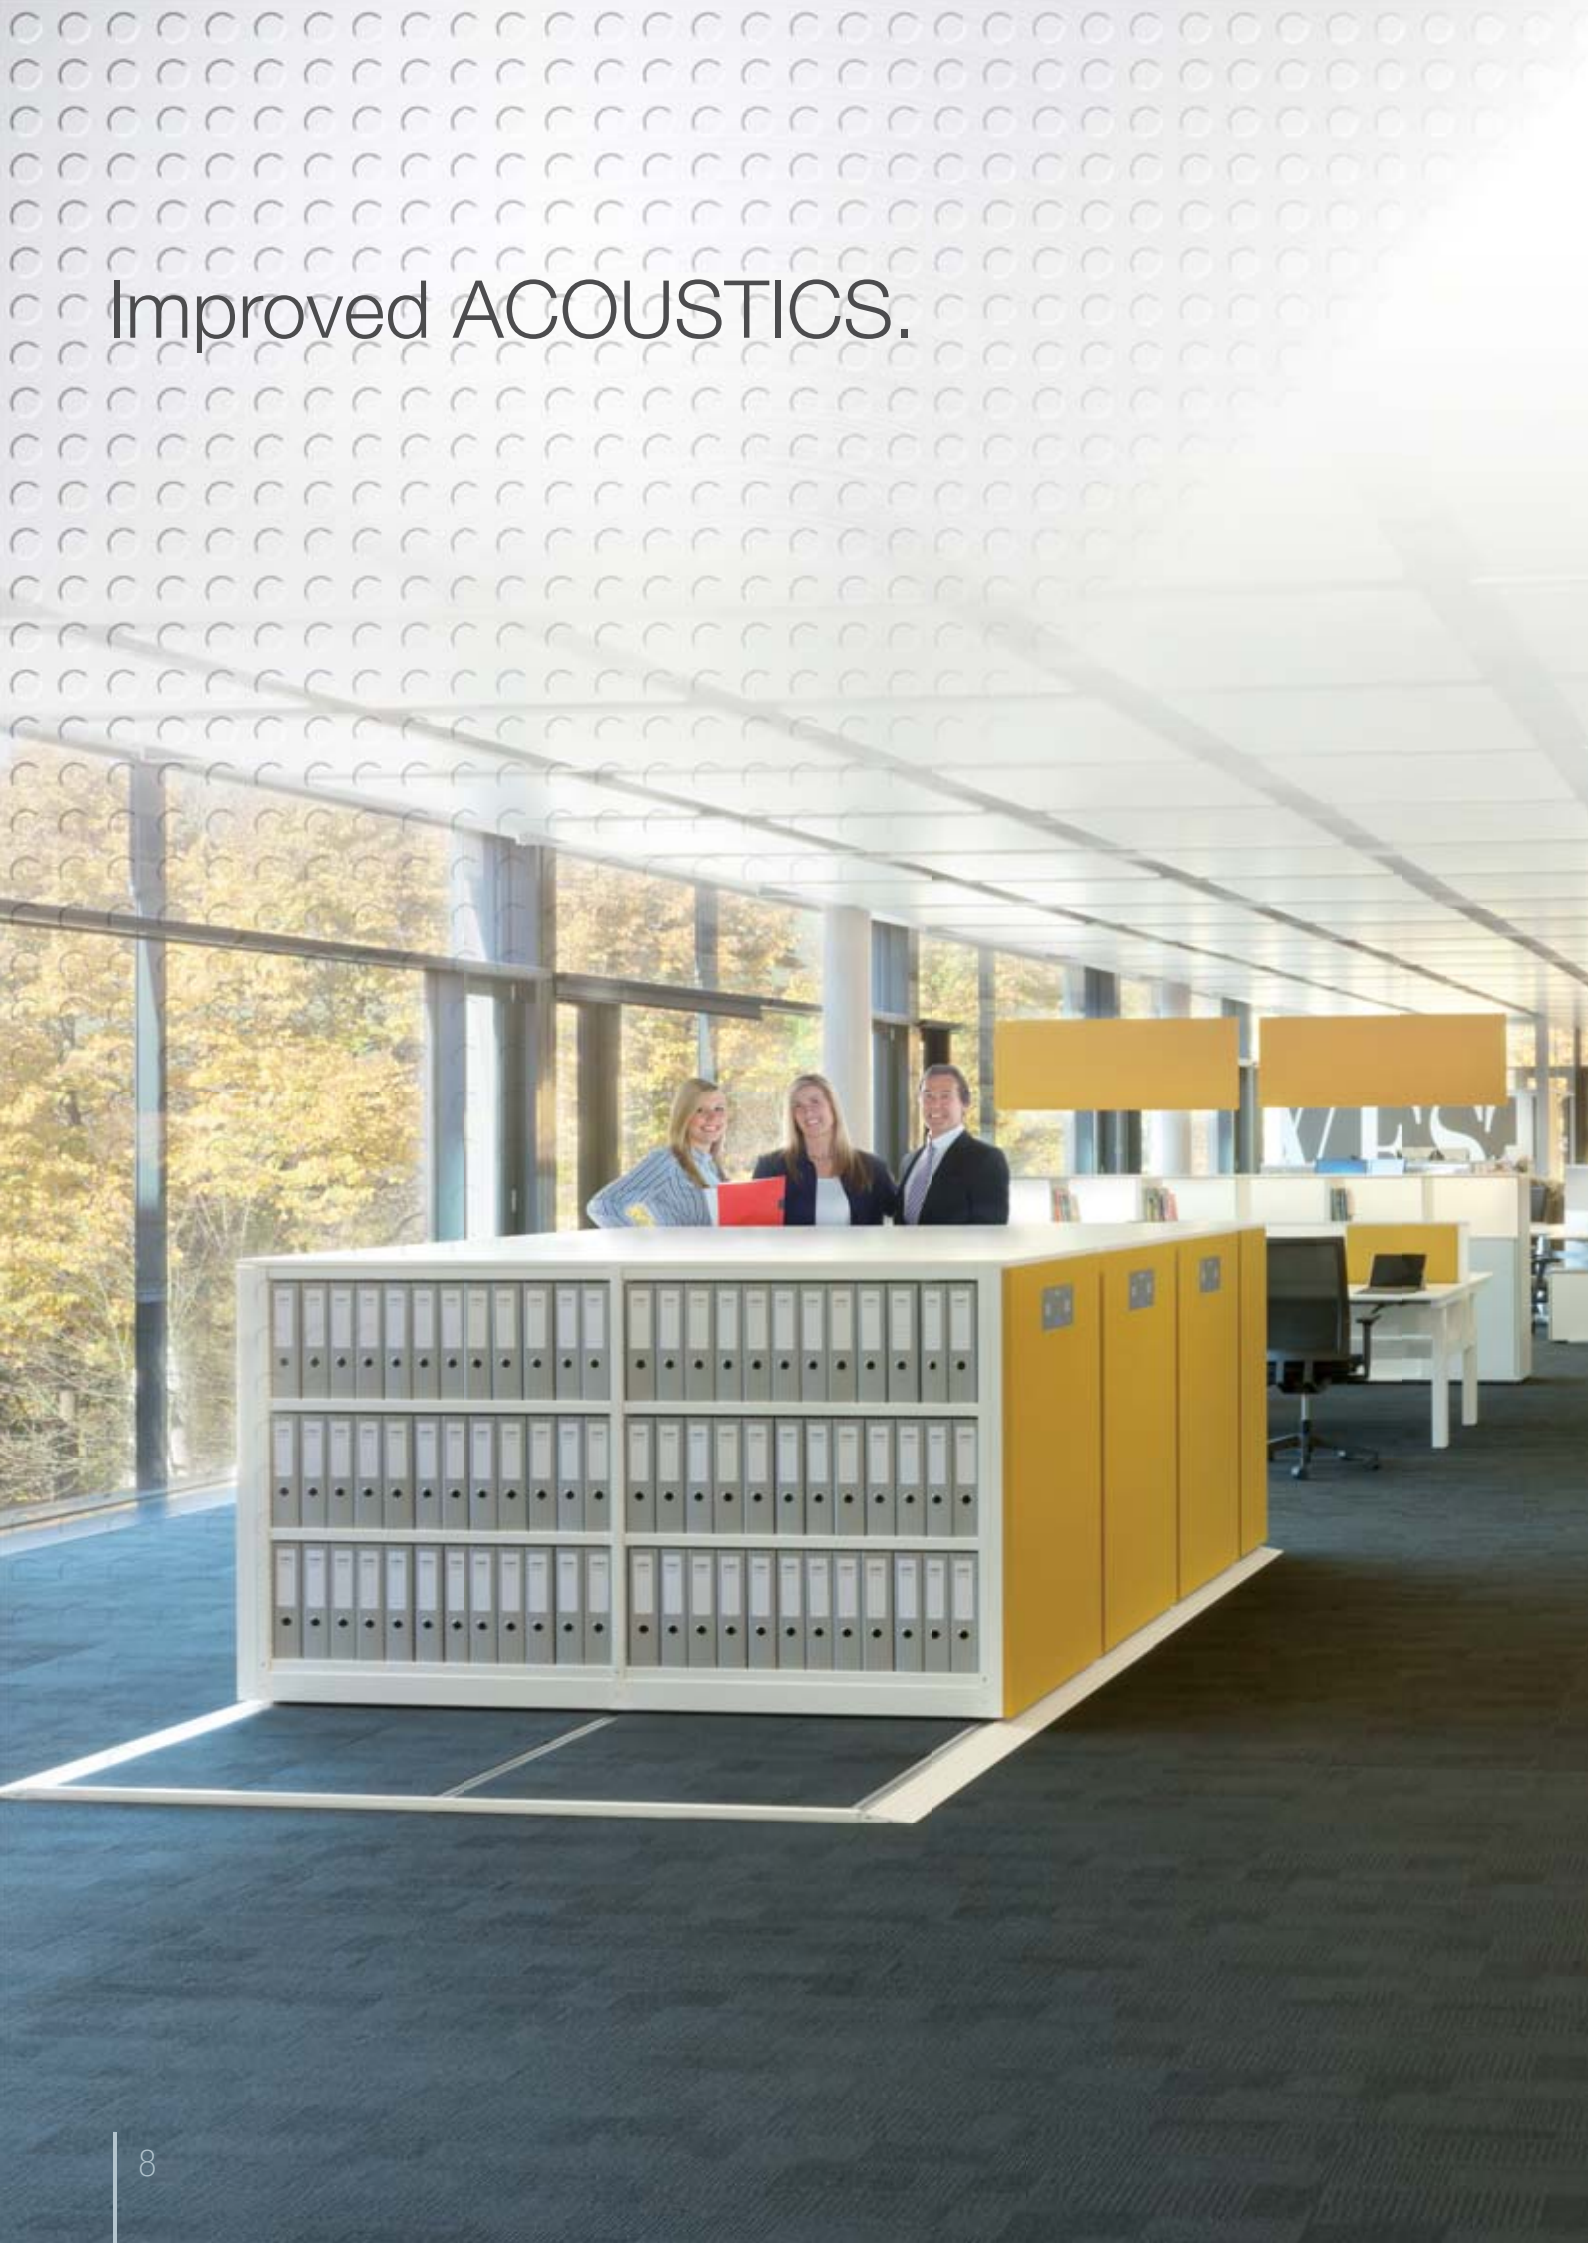

Add your own touch. Use FOREG® Office to match the appearance of your shelving to your furniture. Flexible in its design, variable in the choice of materials – from end panels made of metal or glass to fabric-covered acoustic panels.

You want your office covered in the signature colours of your company? No problem: With FOREG® Office you have a broad spectrum of colours at your fingertips. And those who want an even more individualised touch can have the panels with their favourite motif.

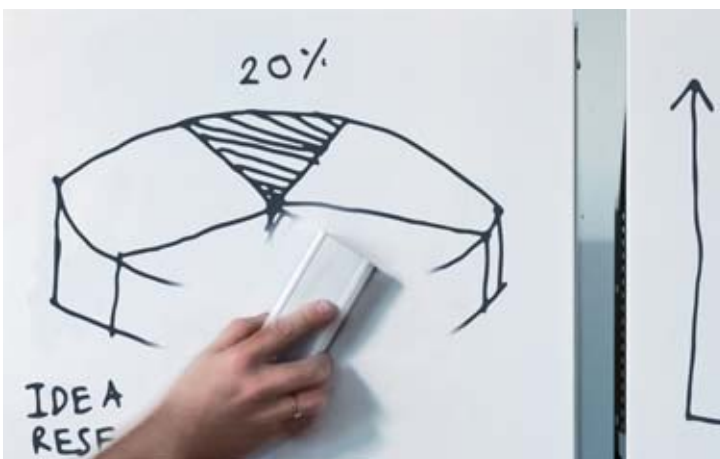

Improved ACOUSTICS.

Let your staff enjoy some peace and tranquility in the office. Use FOREG® Office to reduce the shrill acoustic level of a hard-working crowd. Fitted with fabric-covered acoustic panels (noise absorption class D of Austrian Standard EN ISO 354/11654), shelving systems will turn into effective noise absorbers.

Fabric-covered panels can double as pin boards. And you have a free choice of colours to celebrate your individuality.

For those who still prefer to write and draw in person we supply end panels with a specially coated surface. The result: a perfect whiteboard for scribbling that can be cleaned off with a dry cloth, or attached by magnet to fit a home office, small office or normally sized office equally well.

ADDITIONAL storage.

Extendable

The FOREG® Office system easily adds further modules to your shelving.

The components of the large range of accessories can be combined, retrofitted and exchanged in response to your changing needs. Each part can be height-adjusted by a 20 mm grid same as the shelf panels.

FOREG® Office accessories:

- *Wardrobe bar*
- *Leaf doors*
- *Drawers*
- *Filing cradles*
- *Book ends*
- *Shelf stops*

Archives WITHIN EASY REACH.

Easy to OPERATE – electronically or mechanically.

Ease of operation to meet users' requirements – whether mechanical with a crank drive, push-pull or electronic, the system makes sure that:

- every mobile base moves individually,
- additional mobile bases can be added.

Features of the electronic version:

- power supply required,
- user-defined safety systems (passive safety, distance sensor, motor current monitor, etc.),
- several control functions such as power locks, park and ventilation positioning,
- touch panel (made of real glass).

SIZES and REQUIRED FLOOR SPACE.

The required floor space is easy to calculate:

Example:

Calculate the optimised dimension of your FOREG® Office shelving system from the available floor space:

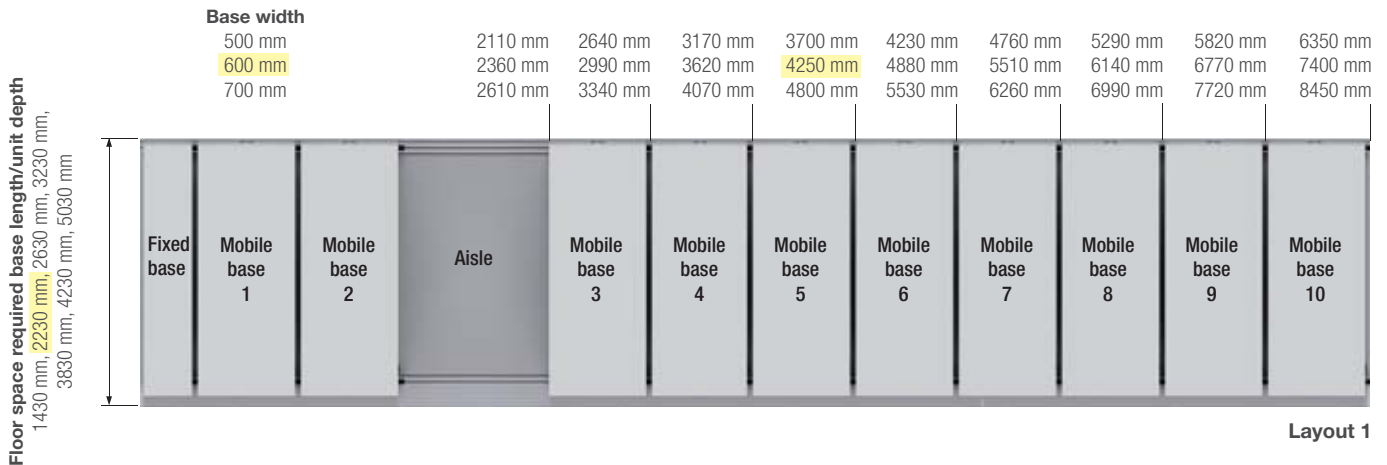

1. You have 4300 mm x 2400 mm in unoccupied floor space.
2. You want to store A4 files → you need shelves of a depth of 300 mm (see base width).
3. Your files come in four heights → you need shelves of a height of 1752 mm (see shelf height).
4. You want to operate the system electrically → you need one fixed base.

Layout 1 provides the following shelving dimensions: 4250 mm x 2230 mm.

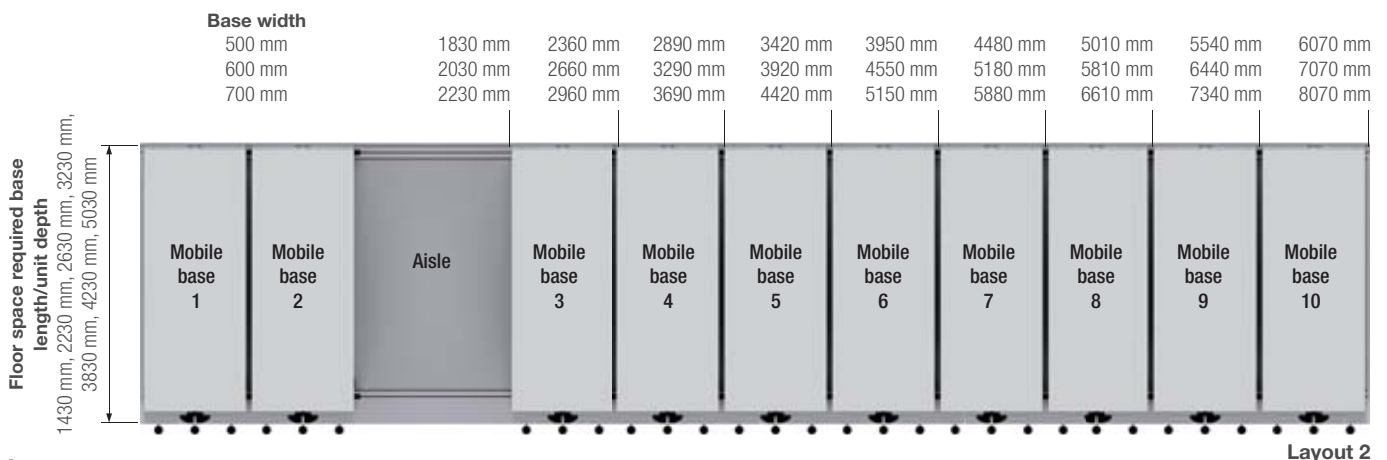

A length of 2230 mm accommodates 2 bays of 1000 mm each (see base depth / unit depth).

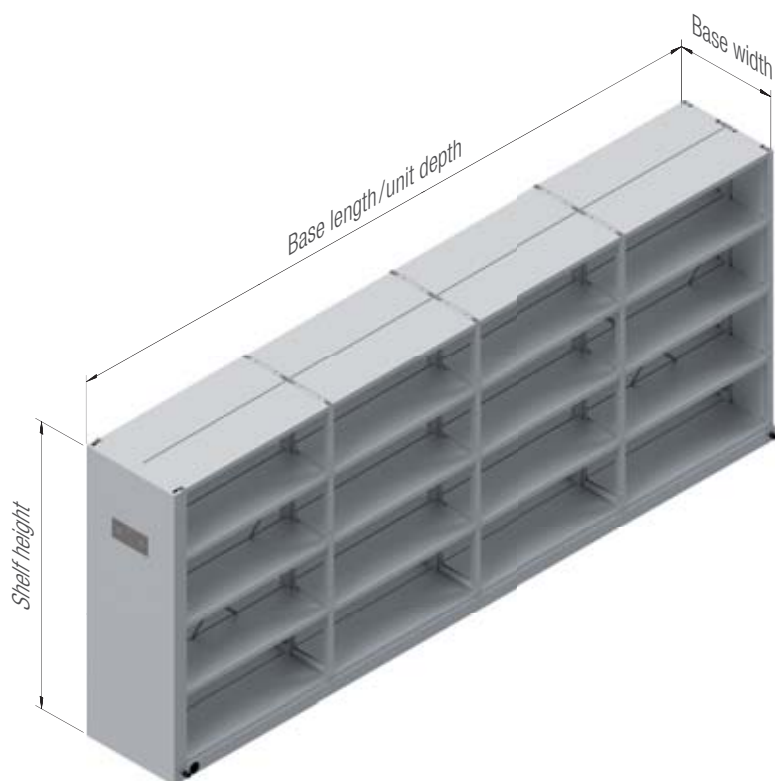

The system (5 mobile bases + 1 fixed base, 4 file heights, shelf depth of 2 bays of 1000 mm each) offers a storage length of 85.4 metres.

FOREG® Office with electric drive and fixed base: FOREG® Office with crank drive and fixed base (optional):

FOREG® Office with crank drive (without fixed base):

Base length/unit depth

The standard model offers seven choices of base length:

Bays	Floor space required base length/unit depth
1 x 1200	1430
2 x 1000	2230
2 x 1200	2630
3 x 1000	3230
3 x 1200	3830
4 x 1000	4230
4 x 1200	5030

Base width

Base width options and associated fixed bases:

Shelf depth	Base width	Fixed base width	E.g. suitable for:
250	500	250	Books
300	600	300	Files
350	700	350	Box files

Unit height

The unit height is obtained from the shelf height + a platform of 40 mm:

	Shelf height	Unit height
3 file heights	1192	1252
4 file heights	1712	1752
5 file heights	1912	1952
6 file heights	2312	2352
