GRID CANOPY

ezoBord

Designed by Studio Eagle Architects. Photographed by Will Ellis Photography.

## **Suspended ezobord Grid Canopies bring room acoustics to an entirely new level. Control room reverberation in both monotone and duotone color options.**

A new generation surface material that both absorbs noise and is fully customizable.

Ceiling mounted for both sound absorption and aesthetic purposes, ezoBord Grid Canopies reduce echo and unwanted noise in boardrooms, meeting areas, open plan offices or a variety of public spaces. Grid Canopies assemble in just a few minutes, are super light weight and easy to suspend from any ceiling with several suspension hardware options to choose from.

Made with recycled plastic water bottles.

Post sheet production FR treatment does not contain any Red List Restricted Chemicals and complies with California Proposition 65. Contact customer service for technical information, test data and safety data sheets for flame retardant.

### Installation

Shipped flat and easily assembled on site. Grid Canopies can be suspended from open deck ceilings or from standard T bar ceilings with optional adjustable hardware.

### Acoustics

Refer to ASTM C423 test chart for specific absorption rates/frequency.

- 1/2" (12mm): NRC 0.85 (subject to mounting conditions and geometrical properties)

### USGBC LEED v4 Credits

While individual products do not 'earn' LEED credits, ezoBord can contribute to the following LEED v4 Credits. Please refer to the USGBC LEED credit guides for detailed requirements.

- EQc9 for enhancing acoustic performance
- MRc3 BPDO for sourcing of raw materials for recycled contribution
- EQc6 interior lighting for surface reflectance (lighter color options).

### Environment

Made of polyester fiber, min. 50% of which comes from recycled water bottles which contributes to LEED MR Credit and BREEAM Health and Wellbeing, Materials points due to recycled content, acoustic performance, and low emitting materials. No VOC's: CDPH v1.2 and REACH SVHC Compliant.
